CHLORALUM.

(Chloride of Aluminium, the Saline Antiseptic harmless as common salt.) The Lancet, August 27th, 1870, says of this pre paration: "It is quite as potent as Chloride of Zinc or Carbolic Acid, and is at the same time non poisonous and devoid of unpleasant smell of every kind. These qualities will, no doubt, insure its being extensively used, and at no distant date we

may expect it to displace the antiseptica which

are at present in vogue."

CHLORALUM is an astringent antiseptic, aplied to foul ulcers by London surgeons, as a garle in scarlet fever, diphtheria and common sore broat, and has been found invaluable in inflam mation of the eyes, &c.

CHLORALUM can be relied on by Farmers in he treatment of Foot and Mouth Disease, and in carrying on disinfection in their homes, stables, owbeds, pigstyes and poultry houses. CHLORALUM for dog kennels can be used with reat advantage and economy in keeping meat

fresh for any length of time, in purifying the benches and yards, and completely removing the foul and sickening odor of dirty or ill drained kennels. For sale in quantities to suit purchasers.
